Journal of Computational and Applied Mathematics 15 (1986) 401–402
North-Holland

Author Index to Volume 15 (1986)

(The issue number is given in front of page numbers)

Adomian, G. and **Rach, R.**, The noisy convergence phenomena in decomposition method solutions (3) 379–381
Al-Hassani, S.T.S., Can, M. and **Watson, E.J.**, A second order approximation to nonlinear circuite quations as applied to high energy electrical discharge processes (2) 175–189
Avdelas, G. and **Leontitsis, A.**, A method for the improvement of the convergence rates of stationary iterative schemes for the solution of complex linear systems (1) 1– 11

Brunner, H., High-order methods for the numerical solution of Volterra integro-differential equations (3) 301–309

Caluwaerts, R., A new direct method for the numerical calculation of a swallowtail (3) 395–396
Can, M., see **Al-Hassani, S.T.S.** (2) 175–189
Chapman, P., see **Reichel, L.** (1) 59– 73
Chawla, M.M. and **Neta, B.**, Families of two-step fourth order P-stable methods for second order differential equations (2) 213–223
Chawla, M.M. and **Rao, P.S.**, A Noumerov-type method with minimal phase-lag for the integration of second order periodic initial-value problems. II: Explicit method (3) 329–337
Chawla, M.M. and **Shivakumar, P.N.**, A finite difference method for a class of two-point boundary value problems over a semi-infinite range (2) 251–256
Chen, G. and **Chui, C.K.**, Design of near-optimal linear digital tracking filters with colored input (3) 353–370
Chui, C.K., see **Chen, G.** (3) 353–370
Crisci, M.R., The tau method with perturbation term depending on the differential operator (1) 123–136

De Sampaio, R.J.B., see **Martínez, J.M.** (3) 311–321
Dierckx, P., An algorithm for fitting data over a circle using tensor product splines (2) 161–173
Dormand, J.R. and **P.J. Prince**, A reconsideration of some embedded Runge–Kutta formulae (2) 203–211

Eilbeck, J.C. and **Manoranjan, V.S.**, A comparison of basis functions for the pseudo-spectral method for a model reaction-diffusion problem (3) 371–378

Forbes, G.W., Truncation and manipulation of multivariate power series (1) 27– 36
Forbes, G.W., Automation of the manipulation of multivariate power series (1) 37– 58

Garloff, Jürgen, Continuation of two previous bibliographies on interval mathematics (News) (2) 265
Greenspan, D., A mathematical curiosity in estimating the radius of the first ring electrons of an arbitrary atom (1) 103–108

Ioakimidis, N.I., Determination of poles of sectionally meromorphic functions (3) 323–327

Jacobsen, L. and **Waadeland, H.**, Even and odd parts of limit periodic continued fractions (2) 225–233
Jeltsch, R., A proof of the order barrier for upwind schemes, by Dahlquist's second barrier (2) 257–259
